

SUGAR COGENERATION HANDBOOK-2021

Prepared and published by:

COGENERATION ASSOCIATION OF INDIA

TABLE OF CONTENTS

INTRODUCTION

I - Overview

Bagasse Cogeneration in India: Current Status & Policies (S.V. Polytechnic College, Bhopal)	24
Cogeneration for Sugar Industry: Present Status & Way Forward (Thermax Babcock & Wilcox Energy Solutions)	30
Evolution of High-Pressure Cogeneration in Sugar Industry (Isgec Heavy Engineering)	36

II - Policy & Regulatory Framework

Cogeneration Policy & Regulatory Scenario in India: Present Status & Future Roadmap (Former Chairman, Central Electricity Regulatory Commission)	41
DSM Regulation, Impact & Opportunities (Former Chief Engineer, State Load Despatch Centre)	45

III - Financing

Economics of Bagasse Cogeneration Plants & Means of Finance (SJ Jaiswal & Associates)	50
Debt Restructuring for Sugar Sector: The Immediate Need (Various)	53
Financing of Sugar Cogeneration Projects (MNRE, IREDA, NCCDC, PFC, NABARD, SDF, HUDCO & NEDFi)	58

IV - Biomass Fuel Issues

Biomass Availability for Power Generation in India (Punjab Renewable Energy Systems)	66
Bagasse Drying	
Drying of Sugarcane Bagasse: Past Approaches (Federal University of Lavras, Brazil)	75
Bagasse Drier Experience at KM Sugar Mills (KM Sugar Mills)	80
Alternative Fuels	
Cane Trash/Rice Straw Help Sugar Industry's Self-Reliance (Cheema Boilers)	83
Co-Firing Biomass/Coal	
Co-firing coal with Biomass Pellets for Electricity Generation in India (International Institute for Applied Systems Analysis, Austria & Council on Energy, Environment and Water, India)	86
Coal-Biomass Co-firing Power Generation Technology: The China Experience (European Technology and Innovation Platform: Bioenergy)	95
RDF Production/Utilization	
RDF Production & Utilization in India (SINTEF, Norway; and CII-GBC & Bhumi Green Energy, India)	99

V - Project Development

Bagasse-based Cogeneration Projects at Sugar Mills – Key Design/Engineering Aspects (Mitcon Consultancy & Engineering Services)	105
Cogeneration Power Plant Design/Layout - Key Aspects (National Federation of Cooperative Sugar Factories)	111
Design Parameters of Electrical Distribution & Evacuation Systems in Sugar Cogeneration Plants (Aami Associate Consulting Engineers)	118
Non-Conventional Energy through Bagasse-based Cogeneration Plants in Maharashtra (Sugar Commissioner)	122

VI - Technology

Boilers & Auxiliaries	
Revenue-Generating Hybrid Air Pollution Control System for Sugar Mill Boilers (Enviropol Engineers)	126
Turbines & Auxiliaries	
Turbines & Auxiliaries: Role in Sugar Cogeneration Plants (Triveni Turbine)	129
Cooling Towers	
Energy Conservation Opportunities in Cooling Towers (Paharpur Cooling Towers)	133
Pollution Control	
Approach Towards Zero Liquid Effluent Discharge in Sugar Plants (Avant-Garde Systems & Controls)	140
Complete Treatment Solution for Sugar, Distillery & Power Complexes: A Model (Balrampur Chini Mills)	144
Water Treatment	
Water Treatment in Sugar Cogeneration Power Plants (Triveni Engineering & Industries)	148

Innovations to Save Water in Cogeneration Plants (Dr. Patangrao Kadam Sonhira SSK)	155
Grid Interface	
Power Quality: Impact of Harmonics and its Mitigation (YASKAWA India)	158
VII - Energy Efficiency	
Energy Efficiency of the Sugar Plant & Cogeneration Power Plant [The Energy and Resources Institute (TERI)]	162
Transformer & System Losses during Off-Season of Cogeneration Power Plants at Sugar Factories (Cogeneration Association of India)	169
Energy Efficient CMR Mills for Sugarcane Milling (Ulka Industries)	173
Effect of VFDs on Energy Optimization: A Case Study (Govt. Polytechnic & VVP Institute of Engineering and Technology)	176
VIII - O&M Issues	
Plant Performance & Operation Monitoring (Ask Energy Group)	180
Optimizing Operations of Existing Bagasse-based, Grid-connected Cogeneration Plants (Mitcon Consultancy & Engineering Services)	184
Effects of Air Ingress in Boilers (Triveni Engineering & Industries)	189
Procedures for Checking Biomass Boilers during Shut Downs (Isgec Heavy Engineering)	191
Air-heater Tube Failures (Avant-Garde Systems and Controls)	195
Condition Monitoring Techniques of Power Transformers (Triveni Engineering & Industries)	198
Generator Operation Modes & Coping with Grid Faults (Triveni Engineering & Industries)	202
Cogeneration & Load Sharing - The Need of The Hour for Sugar Industry (Sicagen India)	206
IX - Value-Added Byproducts	
Ushering An Era of Bio-Mobility™ in India (Praj Industries)	212
Ethanol Sector in India (CARE Ratings)	215
Utilization of Bagasse for Production of Various Value-Added Products (National Sugar Institute)	219
Recovery of Valuable By-products from Distillery Waste (Chem Process Systems)	226
X - Case Studies/Success Stories	
National	
The Green Growth Pledge of Dalmia Bharat Sugar	229
Cogeneration Profile: Kesar Enterprises	232
Water Treatment & Reuse: Shri Gurudatt Sugars Case Study	234
Sugar/Cogeneration Unit Expansion: The Kukadi SSKL Experience	236
Ugar Sugar Works: A Case Study	240
Nirani Sugars – Growth Beyond Imagination	245
International	
South Asian Perspective: Bagasse-Based Cogeneration in Sugar Mills (SAARC Energy Centre, IREET & Bioenergy Consult)	247
Sugar Sector and Cogeneration Potential Assessment in Nepal (IFC South Asia, MITCON, Deloitte)	251
Annexures:	
Report of the RBI Expert Committee on Resolution Framework for Covid-19 related Stress	261
State Bank of India Guidelines Cum Standard Operating Procedure (SOP) for Extending Financial Assistance to Sugar Mills for Enhancement & Augmentation of Ethanol Production Capacity	264
List of Sugar Mills with Cogeneration Plants in India	267
List of Financial Institutions	291
List of State Energy Development Agencies	292
List of Equipment Suppliers & Stakeholders (Major Supporters of Cogen India)	294
COGEN INDIA SPECIAL (Capacity Building, Information Dissemination, Cogeneration Awards & Appeal)	297
